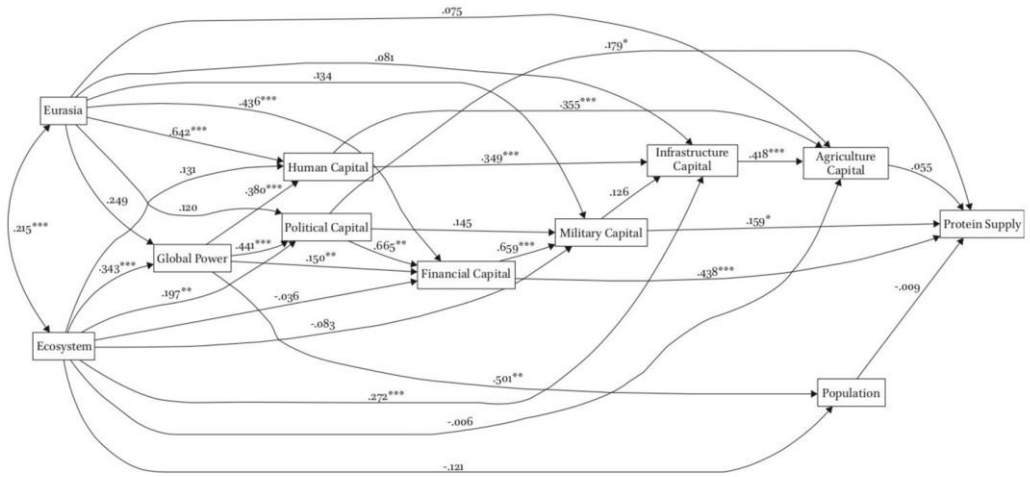
Food Production or Food Distribution: The Key to Global Food Security?

Edward L. Kick
Department of Agriculture and Natural Resource Economics, North Carolina State University
elkick@ncsu.edu

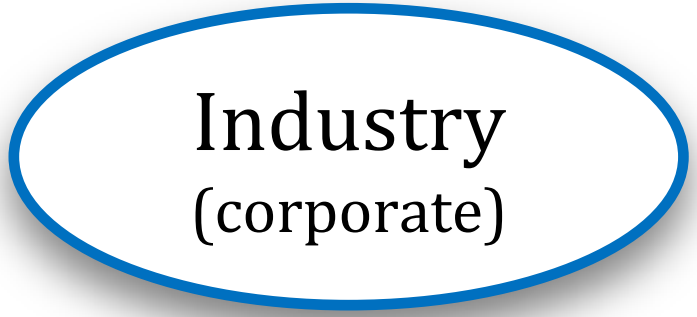
Francesco Tiezzi
Department of Animal Science, North Carolina State University
f_tiezzi@ncsu.edu

Diego Castedo Pena
Department of Mathematics, North Carolina State University
dcasted@ncsu.edu



NOTE: The numbers on each path if starred are statistically significant standardized coefficients representing the impact of the causal variables on the caused variables.

FIGURE 1 *Model of the causal antecedents of food security (daily protein consumption per capita).*



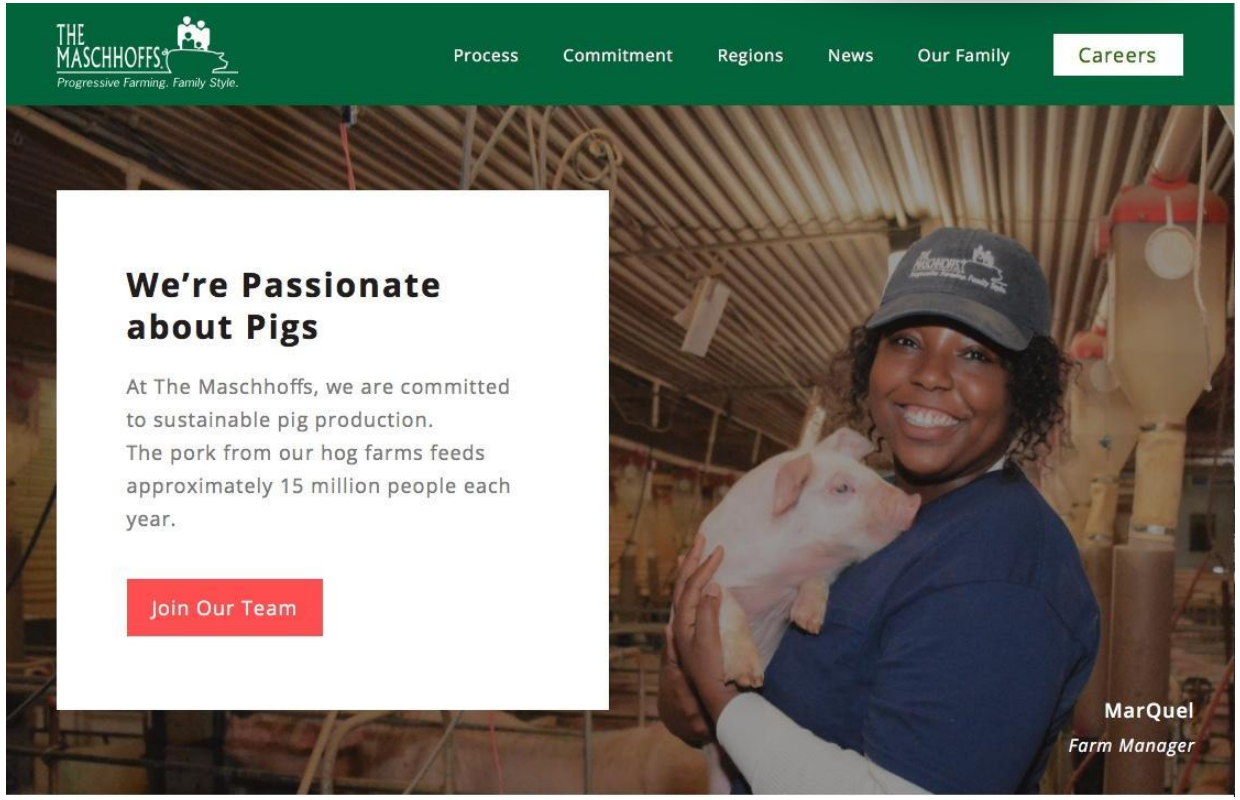
Industry
(corporate)

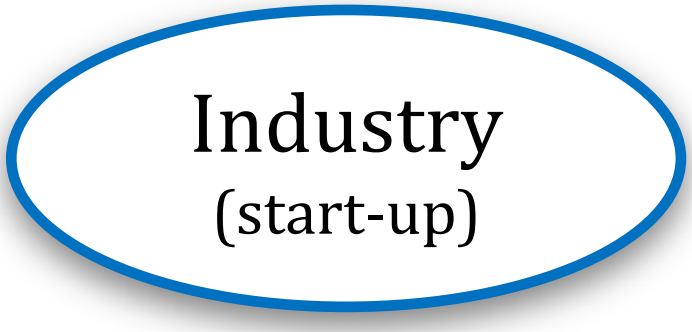
The Maschhoffs LLC.

THE MASCHHOFFS
Progressive Farming. Family Style.

Industry
(corporate)

- Data Mining
- Improved Data-Capture systems
- Variance Components Estimation
- Breeding Value Estimation
- Selective Genotyping
- Genomic Evaluations
- New and Innovative traits





Industry
(start-up)

Industry
(start-up)

Advanced Animal Diagnostics

- Breeding value prediction for innovative traits

Let's get right to the point.

No one has time to wait for answers. That's why we are developing QScout®RLD (Rapid Leukocyte Differential). It reports a white blood cell count and differential at point of care in about 2 minutes from a drop of blood*.

QSCOUT® RLD

Forget the hassle.

QScout RLD requires no lengthy machine startup time or sample prep. No wet reagents that need to be changed or disposed. No pumps. Only a drop of blood. It's easy to use with minimal training.

Doctorate in Italy, doctorate in the US: how do they compare?

Doctorate in Italy, doctorate in the US: how do they compare?

Depth

Doctorate in Italy, doctorate in the US: how do they compare?

Depth ⟷ Breadth

You got your doctorate: who's going to be your collaborator?

What is a doctorate good for?

Learn how to do research

- Training in:
  - Wet-lab, dry-lab
  - Public speaking
  - Interaction with peers
