

Economics, appraisal and law

Research Area

**Agri-food, forest and natural resources economics.
Land appraisal, law and policies for the territory and
the environment**

General topics

- Agricultural, agri-food, forestry and natural resources economy.
- Economics and Rural Development.
- Economic development in rural areas of developing countries.
- Analysis of markets in the agricultural, forestry and agri-food sectors.
- Analysis of production chains in the agriculture, agri-food, forestry sectors and rural development.
- Marketing of agricultural, agri-food and forestry products.
- Farmland appraisal and rural land market.
- Economic valuation of environmental goods, natural resources and landscape.
- Agricultural, environmental and landscape laws.
- Policies for the development of agricultural, agri-food, forestry and natural resources.
- Policies for territorial governance and the valorisation of landscape and rural resources.
- Policies and strategies for rural development.

Specific topics

- Supply, demand, and policy for quality agri-food products.
- Valorisation of quality agri-food production on the international market.
- Assessment of the impact of the Common Agricultural Policy and development of rural areas.
- Analysis of the international agri-foods market.
- Marketing of agri-food products and wines.
- Analysis of agriculture and viticulture policies.
- Markets, organisation, and competitiveness of wine supply chains.
- Markets and policies for timber and non-timber forest products.
- Payments for ecosystem services (PES): models and mechanisms.
- Policies and instruments for mitigation and adaptation to climate change in forestry.
- Instruments and policies for environmental and social responsibility in forest management.
- Forests as common goods.
- Economic valuation of environmental goods, natural resources and the landscape.
- Analysis of demand for tourism and recreational activities in rural and mountainous areas.
- Innovative methodologies for the assessment of real estate.
- Economics of biomass for energy.
- Analysis of demand for energy resources.
- Legal aspects of the agricultural landscape: alternatives to the restrictive planning regime.
- New legal instruments for land consolidation and preservation of the integrity of the farm.
- Protection of biodiversity in international, European, and national normative frameworks.
- Monitoring and evaluation of natural resource governance and policies.
- Innovation and social capital in rural development programmes and policies.
